

Pre-assesment -> Python for Data Analysis with AI assistance

* Indicates required question

1. Email *

2. Name *

3. Course *

4. Shift *

5. 1.What library in Python is commonly used for data manipulation and analysis?

* 1 point

Mark only one oval.

☐

Pandas

☐

Matplotlib

☐

Numpy

☐

Scikit - learn

6. 2. In Python, which module provides functions for working with dates and times ? * 1 point

Mark only one oval.

- ☐ random
- ☐ math
- ☐ numpy
- ☐ datetime

7. 3. What is the primary data structure in Pandas used for storing and working with tabular data? * 1 point

Mark only one oval.

- ☐ Series
- ☐ Array
- ☐ DataFrame
- ☐ Dictionary

8. 4. Which python library is widely used for creating data visualizations and plots ? * 1 point

Mark only one oval.

- ☐ Numpy
- ☐ Matplotlib
- ☐ Scikit - learn
- ☐ None

9. 5. What Python function is used to read a CSV (Comma - Separated values) files into a Pandas DataFrame ? * 1 point

Mark only one oval.

- ☐ df.describe()
- ☐ plt.savefig()
- ☐ pd.read_csv()
- ☐ np.load()

10. 6. In Python, what is the main purpose of the "groupby" operation in Pandas? * 1 point

Mark only one oval.

- ☐ Sorting data
- ☐ Filtering data
- ☐ Reshaping data
- ☐ Grouping and aggregating data

11. 7. Which Python library is commonly used for statistical analysis and hypothesis testing? * 1 point

Mark only one oval.

- ☐ SciPy
- ☐ Pandas
- ☐ Seaborn
- ☐ Plotly

12. 8. What is the primay purpose of the Matplotlib library in Python? *

1 point

Mark only one oval.

- ☐ Statistical analysis
- ☐ Machine learning
- ☐ Data manipulation
- ☐ Creating data visualizations

13. 9.Which Python library provides tools for working with multi- dimensional arrays and matrices? * 1 point

Mark only one oval.

- ☐ Matplotlib
- ☐ Pandas
- ☐ Numpy
- ☐ Scikit-learn

14. 10. What Python function is used to select specific rows and columns from a Pandas Data Frame? * 1 point

Mark only one oval.

- ☐ np.array()
- ☐ df.loc[]
- ☐ pd.read_csv()
- ☐ None

15. 11. In Pandas, what method is used to remove missing values from a DataFrame? * 1 point

Mark only one oval.

- ☐ groupby()
- ☐ drop_duplicates()
- ☐ dropna()
- ☐ fillna()

16. 12. Which Python library is commonly used for machine learning and predictive modelling? * 1 point

Mark only one oval.

- ☐ Matplotlib
- ☐ Pandas
- ☐ Numpy
- ☐ Scikit-learn

17. 13. What Python library provides interactive and web based data visualization? * 1 point

Mark only one oval.

- ☐ Plotly
- ☐ Seaborn
- ☐ Pandas
- ☐ Matplotlib

18. 14. What is the primary data structure in Numpy used for storing and performing operations on numerical data? * 1 point

Mark only one oval.

- ☐ Tensor
- ☐ Series
- ☐ DataFrame
- ☐ ndarray

19. 15. In Pandas, what method is used to calculate summary statistics for numerical columns in a DataFrame? * 1 point

Mark only one oval.

- ☐ groupby()
- ☐ value_counts()
- ☐ describe()
- ☐ reshape()

20. 16. Which Python library is commonly used for data exploration and data cleaning tasks, providing interactive * 1 point

Mark only one oval.

- ☐ Pandas
- ☐ Jupyter Notebook
- ☐ Seaborn
- ☐ None of the above

21. 17. In Pandas, which method is used to sort a DataFrame by the values in one or more columns in ascending or descending order? * 1 point

Mark only one oval.

- ☐ apply()
- ☐ pivot_table()
- ☐ sort_values()
- ☐ filter()

22. 18. What is the primary purpose of the Seaborn library in Python for data analysis and visualizations? * 1 point

Mark only one oval.

- ☐ Machine learning
- ☐ Data manipulation
- ☐ Web development
- ☐ Statistical data visualization

23. 19. In Python, which library is often used for creating interactive dashboards and web applications for data analysis and visualization? * 1 point

Mark only one oval.

- ☐ Dash
- ☐ Numpy
- ☐ Matplotlib
- ☐ Pandas

24. 20. What Python function is used to perform element-wise mathematical operations on Numpy arrays? * 1 point

Mark only one oval.

- ☐ describe()
- ☐ plt.plot()
- ☐ df.apply()
- ☐ np.add()
